

Endpoint Management for Complex Environments

For organizations with endpoints that need world-class operational control

For more than 15 years, Anunta has managed desktop environments across regulated industries. We don't just deploy tools. We operate them. We stabilize hybrid estates, inherit fragmented environments, and deliver structured Day 2 ownership — whether we built the environment or not.

A Structured Operating Model

We assess endpoint maturity, identify risk, and restore operational control where needed.

Industry Experience

What We Manage

Modern Desktop Management

- Intune and hybrid co-management
- Configuration standardization
- Policy governance

Device Lifecycle Management

- Procurement coordination
- Imaging and deployment
- Refresh strategy
- Retirement and data sanitization

Security & Secure Access Alignment

- Procurement coordination
- Imaging and deployment
- Refresh strategy
- Retirement and data sanitization

Mobile Device Management

- Secure enrollment
- Compliance enforcement
- BYOD governance

OS Migration & Transformation

- Readiness assessments
- Pilot management
- Phased rollout execution

Proactive Monitoring & Optimization

- Experience telemetry
- Automated remediation
- Performance baselining

What Organizations Gain

Strategic Outcomes:

- Stronger compliance posture
- Clear operational ownership
- Reduced risk during change events
- Scalable endpoint governance

Operational Outcomes:

- Fewer escalations
- Faster issue resolution
- Standardized configurations
- Predictable lifecycle management
- Lower endpoint-related disruption

ANUNTA BY THE NUMBERS
