Healthcare: Managed Network Services

Resilient and secure in mission-critical environments.

Anunta keeps hospital environments stable, secure, and optimized with 24×7 monitoring, rapid remediation, and deep modernization expertise.

Anunta Delivers Value in Healthcare

Healthcare organizations turn to Anunta when they face:

Aging switches, inconsistent VLANs, and wireless gaps	Uptime pressure in ORs, ICUs, ERs, and pharmacy workflows	Rising compliance expectations (HIPAA, etc.)	Operational fatigue from nonstop incidents and alerts

"Hospitals can't afford uncertainty in their networks. Our job is to keep every environment resilient and ready — so clinicians never have to think about what's happening behind the scenes." — Jamie North, Senior Network Architect, Anunta

Healthcare Success in Action

Campus-wide overhaul of switching, wireless, segmentation, and security for a major health network.

24-hour recovery after a provider's multi-day outage: full environment restored and stabilized.

Epic surge capacity: hundreds of desktops deployed in 24 hours with zero clinical disruption.

Ongoing operations for a 20,000-employee health services organization.

Measured Impact

- 30% reduction in network incidents
- <0.3 incident-to-user ratio
- 99.9% availability across managed environments
- 88 NPS in North America

25+ years of enterprise + hospital expertise | 650 certified professionals | 400k+ devices actively managed

STRENGTHEN YOUR HEALTHCARE NETWORK
